

SOLO-JEC 7™

Canine Distemper-Hepatitis-Parainfluenza-Parvovirus
Vaccine - *Modified Live Virus*
Leptospira Bacterin

DESCRIPTION:

Solo-Jec-7™ vaccine is a combination of antigenic, attenuated strains of Canine Distemper, Canine Parainfluenza, Canine Hepatitis and Parvovirus propagated in cell line tissue cultures. The liquid diluent is Parvovirus-Vaccine-Leptospira canicola-icterohaemorrhagiae Bacterin. The CD Virus fraction has been proven safe and non-shedding when injected into susceptible dogs. The infectious Canine Hepatitis (CAV-1) fraction cross protects against respiratory disease caused by CAV-2.

INDICATIONS:

For the vaccination of healthy, susceptible dogs against disease caused by canine distemper, hepatitis (canine adenovirus type 1), canine adenovirus type 2, parainfluenza, parvovirus, *Leptospira canicola* and *Leptospira icterohaemorrhagiae*.

FOR USE ON:

Dogs

DIRECTIONS:

The dry Distemper-Hepatitis-Parainfluenza Vaccine is rehydrated with 1 mL of liquid Parvovirus Vaccine-Leptospira canicola-icterohaemorrhagiae Bacterin. Shake well and use entire contents when first opened.

PACKAGING:

1 dose vial of dry vaccine, 1 dose vial of liquid diluent, and 1 disposable syringe per box
96 boxes/case
